

# Free Add-On for Quick Searching in the SAP Developer Network (SDN)

## movento develops add-on for SAP users: “SAP SDN Search”

**Mannheim, 26.11.09** – Effective immediately, “SAP SDN Search,” a free add-on for common Internet browsers such as Microsoft Internet Explorer, Mozilla Firefox, and Opera, is available to everybody who uses the SAP Developer Network (SDN) .

The add-on was developed by movento and helps search for contributions, terms, forums, etc. in SAP Developer Network directly from the browser’s search field without having to call up the SDN page first. Anyone who wants things to move still faster can use the direct search for marked words with a right-click in Firefox. Then the search term does not have to be entered into the search window and the results from the SDN are displayed right away.

The idea for the add-on came from Tobias Abb, a technical consultant at movento GmbH: “For me it was as for many developers who use the SDN often: to search, I first had to call up the SDN page and then enter the search term there. With the add-on, I can now search quickly and easily from my current page directly in the SAP Developer Network without having to leave my current page.”

The add-on “movento Search for SAP SDN” is available for free download at [www.movento.com](http://www.movento.com) or <https://addons.mozilla.org/de/firefox/addon/15100> .
